

# Garv Jain

Jaipur, India | garvjain0035@gmail.com | +91 9414765227 | linkedin.com/in/garvjain7 | github.com/garvjain7

## Summary

**Backend Engineer** | System Design | Python | Built AI Powered Applications and Backend Systems | Databricks Certified Data Engineer Associate | GATE 2026 Qualified | RHCSA Certified (2025) | 7+ NPTEL Certifications (CS Domain)

## Education

**B.Tech (CS)** - Poornima Institute of Engineering and Technology, Jaipur – 8 GPA Sept 2023 – ongoing  
**Senior Secondary (12<sup>th</sup>)** - Quantum Classes, Baran(Raj) – 85.20% (PCM) 2023  
**Secondary (10<sup>th</sup>)** - Apex International School, Baran(Raj) – 93% 2021

## Experience

**Team Lead & Backend Developer** – SparkIIT Feb 2026 – May 2026

- Led backend development and technical planning for a scalable full-stack platform across a small engineering team.
- Designed REST APIs, PostgreSQL database schemas, and modular service-layer workflows for structured feature integration.
- Coordinated frontend-backend integration, project architecture decisions, and implementation planning across multiple modules.

**Software Developer Intern** – Software Technology Park of India (STPI), Jaipur May 2025 – June 2025

- Developed backend APIs and integrated PostgreSQL database for a full-stack application during a 45-day internship.
- Designed and implemented data models and API endpoints to support core application functionality.
- Collaborated using Git/GitHub and followed structured development workflows across feature implementation and testing.

## Projects

**ScanVista — AI-Powered QR to 3D Product Visualization Platform** May 2026 – Present

- Architected a multi-phase platform for QR-based 3D visualization, AR experiences, AI voice interaction, and recommendation workflows.
- Designed modular full-stack architecture using React, Three.js, Node.js, PostgreSQL, Redis, FastAPI, and WebXR.
- Engineered scalable database schemas, async analytics pipelines, and extensible service-oriented backend workflows.

**CodeAlive — Code Sharing Platform** (Try it Live) Feb 2026 – Present

- Built a code sharing platform using **FastAPI, PostgreSQL, Redis, MongoDB** with anonymous access and custom URLs.
- Designed features like **AI code explanation, real-time collaboration (WebSockets + Redis), and multi-tenant org system.**
- Implemented async backend with **session auth, compression pipeline, and background tasks** for performance.
- Developed editor with **CodeMirror 6**, supporting highlighting, inline images, and multi-language detection.

## Technologies/Skills

- **Programming Languages:** Python, C++
- **Database:** MySQL, PostgreSQL (with PostGIS), Redis, MongoDB Atlas
- **Web Development & Frameworks:** Flask, FastAPI, Node.js, React
- **Tools:** Git/GitHub, Linux(Basics), VS Code, Ollama, Render, Neon, Vercel
- **Additional Skills:** REST APIs, DSA, Machine Learning, System Design, System Administration (RHCSA)

## Relevant Coursework and Certifications

- **Cyber Security and System Administration:** Red Hat Certified System Administrator — RHCSA (Globally valid)
- **Data Science and Machine Learning:** Databricks Certified Data Engineer Associate | Introduction to ML (NPTEL)
- **Business and Others:** Entrepreneurship and IP Strategy (NPTEL) | Getting Started with Competitive Programming (NPTEL)

## Achievements

- Research Publication: “Investigation on Waste Management and Its Recycling,” IJPPC (2025)
- Qualified **GATE 2026** (Computer Science)
